I have a blog and I have several published posts. The problem is that I do not know which one of them is the most recent and I do not know how to get this information. I am using Wordpress and I used the get_archives() function to get a list of my posts. However, I could not figure out how to sort the posts and get the one that is most recently published. In my template, I used: 10, 'post_type' => 'post');
